Case Study - Client Diaries

Grade - Dr Bio 7272 Application - Compostable Bio Hazard Bags

Client - RDM Industries. USA

Background

Dr Bio 7272 was established to work on the current infrastructure of blown film extrusion line.

The client is located in California USA and is a pioneer in Compostable films in West Coast USA. The client wanted to produce Bio Hazard Compostable bags on his existing setup

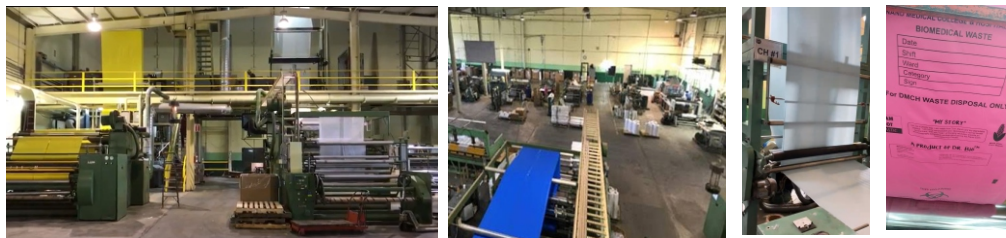

Operations

A compostable film of 20 and 35 microns with printing with red pigment was produced and tested for mechanical properties, sealing strength which found to be pass the required standards.

The film was run at 145 degrees C or 290 F on the extrusion plant and the client intends to produce 5 million bags per month and further shall increase capacity over time.
